IV. 2012 SOM Ballot – Two New Provisional Standards

1. *Standard Practice for Continuous Thermal Profile of Asphalt Mixture Construction*

- a. One Negative from Georgia was resolved by TS Chair
- b. FHWA's voting member and TS Vice Chair, Matthew Corrigan was unable to comment due to not receiving the voting ballot. Comments received from FHWA via Lee Gallivan will be incorporated prior to publication.
- c. Gallivan stated the IR bar manufacturer, MOBA, is moving forward with an alternative device than the "bar" required/documented in the standard.
 - i. TS Chair removed the prescription for "bar" and associated "bar" specific sensor locations from the standard.

2. *Standard Practice for Compaction Technology for Embankment and Asphalt Pavement Applications*

- a. Two Negative votes:
 - i. Negative from Georgia has been resolved.
 - ii. Chair, Curt Turgeon contacted Virginia's negative regarding use of the term "certify" for equipment approval in appendix.
 1. Andy Babish, Virginia- Virginia's negative is due to the requirement for the DOT to certify the equipment
 2. Chair Turgeon agrees with Virginia's negative but has experienced instances in MN where the equipment was not "fit for purpose" when not certified.

3. Chair Turgeon removed word “certify” from standard and replaced with alternate language.
 4. Virginia removed negative based on removal of DOT certification requirement language from the standard.
 - b. FHWA’s voting member and TS Vice Chair, Matthew Corrigan was unable to comment on the ballot due to not receiving the voting ballot. Comments received from FHWA via Lee Gallivan will be incorporated prior to publication.
 - c. Other editorial comments will be incorporated prior to publication as provisional standards.
3. A SHRP II implementation meeting for *Thermal Profile and Asphalt Density using Ground Penetrating Radar* will be held February 25-26, 2014
