

**TS 2b Meeting Summary**

**Meeting Date:** 8/6/2015 10:00

**Items approved by the TS for Subcommittee Ballot:**

Standard Designation	Summary of Proposed Changes	Subcommittee Only or Concurrent?
TP XXX	New standard for Extended BBR Test	Concurrent
TP XXX	New standard for Binder Yield Energy Test (BYET)	Concurrent
TP 102	Changes to be made in accordance with Task Force suggestions in order ensure standard matches NTPEP work plan.	Concurrent
M 320	Revision to M 320 to allow for other PAV Temperatures depending on climate	Subcommittee

**New Task Forces Formed:**

Task Force Name	Summary of Task	Names of TF Members
TF 15-01	Address Negatives on tech section ballot regarding changes to M 320 to allow for extended range of temperatures	John D'Angelo, Arizona (Sandoval), and Ala Mohseni (Pavement Systems), Virginia, New Jersey (Lead).
TF 15-02	Re-write T 48 as an AASHTO only standard meant specifically for asphalt binders.	New Jersey (Lead), AMRL (Maria Knake), Virginia, Texas (Jerry Peterson), North Dakota.

**Research Liaison:** Chris Abadie

**Other Action Items:**

A motion passed for TS 2b to endorse a research problem statement on short and long-term Aging Methods to Accurately Reflect Binder Aging in Different Asphalt Applications

Date of mid-year web meeting changed set for Feb 17.

Mike Anderson (Asphalt Institute) will follow up with Mark Woods (Tennessee) to work towards resolution over concerns regarding Jnr requirements in M 332.

AMRL will collect data regarding make, model, version of script (software), used for MCSR during the next round of proficiency samples to address concerns that different equipment and scripts are causing differences in results. AMRL will work with John D'Angelo regarding how the binder designation is stated (we should state 64, not 72 to adjust to new grading system).

Request Binder ETG to look at issues with % Jnr diff reported by Rick Bradbury (ME).
